Does litetronics offer a battery backup kit?

Contact us Litetronics's LED emergency battery backup kit includes the battery, charger and driver in a single unit. Click here to learn more about our safety solution.

What is led emergency battery backup?

Our LED emergency battery backup line offers a dependable solution for virtually every LED lighting application. These emergency drivers feature a variety of form factors and have options designed to fit almost all commercial fixture types.

How reliable is the led emergency battery backup?

Reliable emergency backup performance for standard voltage ranges (120-277V). Designed for higher output fixtures up to 300W with universal voltage support (120-480V). The LED Emergency Battery Backup is moderately priced and loaded with all the options you'll need to ensure safety for the occupants of your space.

How do emergency backups work?

These emergency backups directly power the LED modules on the secondary side of the driver, bypassing the normal driver to maintain illumination. They're designed to work with virtually any fixture type using existing Class 2 LED systems. Fully enclosed solutions that combine battery and emergency driver into a single unit for easier installation.
