What happens if you don't protect your business from lightning?

Without proper protection in place, lightning can cause catastrophic damage to your buildings and mechanical systems. DEHN's comprehensive lightning protection solutions act as a shield between your business's power quality and safety, and the devastating side effects of a lightning strike, especially fires.

What is structural lightning protection?

Structural lightning protection involves the use of specialized systems designed to intercept, conduct, and safely disperse the electrical energy generated by lightning strikes, thereby preventing damage to buildings and infrastructure. These systems typically include air terminals (a lightning rod), down conductors, and ground electrodes.

What happens if you don't protect your building from lightning?

Lightning is not an uncommon phenomenon. In fact, worldwide, lightning strikes nearly 40 times per second. When your buildings lack proper lightning protection, these intense electrical surges are even more likely to occur and lead to fires, structural damage, and widespread power disruptions.

What is Dehn lightning protection?

DEHN's comprehensive lightning protection solutions act as a shield between your business's power quality and safety, and the devastating side effects of a lightning strike, especially fires. Check out our selection of products below. Contact us!

From expensive electronics to essential facilities, the risk of lightning-related damage is too high to ignore. Fortunately, DEHN offers a wide range of solutions designed to neutralize these ...

In this blog, I will share some effective lightning - protection measures for power cabinets based on my years of experience in the industry. Lightning is a natural electrical discharge phenomenon. When a ...

In this blog, I will share some effective lightning - protection measures for power cabinets based on my years of experience in the industry. Lightning is a natural ...

The invention belongs to the field of a power distribution cabinet, and particularly relates to an intelligent lightning-proof power distribution cabinet, which consists of a shell, a...

With global lightning strikes increasing by 12% annually (NOAA 2023), energy storage facilities in Southeast
