What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:

What is a 373kwh outdoor cabinet?

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy storage blocks. Designed for 373kWh's to 100MWh+ systems.

How many 373kwh cabinets can be installed together?

Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy storage blocks. Designed for 373kWh's to 100MWh+ systems. Each 373kW liquid cooled outdoor cabinet solution is pre-engineered and manufactured to be ready to install.

Designing an efficient Liquid Cooled Energy Storage Cabinet begins with an understanding of heat generation at the cell level and the role of uniform temperature control in performance stability.

Designing an efficient Liquid Cooled Energy Storage Cabinet begins with an understanding of heat generation at the cell level and the role of uniform temperature control in ...

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy ...

The core hardware of a liquid cooled battery cabinet includes a sealed enclosure housing the battery modules, cooling plates, and fluid circulation systems.
