What is a new energy storage project in Lithuania?

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA). The deadline for applications is June 17, 2025.

Who manages Lithuania's electricity storage facilities?

At the end of July 2021, the Government of the Republic of Lithuania appointed Energy cells, a company of the EPSO-G Group, as the operator of the instantaneous isolated operation electricity reserve for Lithuania's electricity storage facilities and entrusted it with the management of the electricity storage facilities system.

Why is electricity storage important in Lithuania?

Lithuania's system of electricity storage facilities is essential to ensure the security of Lithuania's energy system and its ability to operate in isolated mode.

How will Lithuania's energy storage system work?

Energy storage system will ensure the security of supply of Lithuania's energy system and the possibility to operate in an isolated mode. For Lithuania before the synchronisation with the continental European networks (CEN), will be used for the integration of energy generated from renewable energy sources after the synchronisation.

Data about EPSO-G is collected and stored in the Register of Legal Entities of the Republic of Lithuania.
