Why is the EDF Group investing in battery storage?

The EDF Group are investing in battery storage - \$10 billion by 2035 - to help support a more sustainable energy future. It's important to this as an energy company so we can make sure our electricity systems can support new technology and renewable sources of energy. Read more about our plans in this article from Green Tech Media.

How will EDF Group contribute to the development of new storage systems?

With the storage plan, EDF Group intends to develop 10 GW of new storage systems worldwide by 2035. R&D is contributing fully to this objective. As part of this, it has laboratories dedicated to battery research. Experts work on battery performance and their contribution to the expansion of renewable energies in electricity systems.

What is EDF power solutions?

To develop these innovative projects, EDF power solutions builds on the expertise of its dedicated EDF Store & Forecast subsidiary, which was set up in 2014 and has developed a smart software solution to coordinate generation from renewable sources via forecasting and energy storage.
