Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

Is floating solar a good option for Laos?

"Floating solar is an important new technology option for Laos that can be used in conjunction with hydropower to help provide year-round energy stability," Ambassador Kelly said. "Both Australia and the UK are investing in large floating solar plants at home and have lessons to share with Laos on project development, financing and operations."

How does CGN contribute to Laos' economic development?

In addition to contributing to Laos' economic development, CGN is committed to sharing the benefits with local communities. CGN has implemented initiatives such as vocational training, educational support, community building, medical assistance, and agricultural aid to address urgent local needs and improve living standards.

How will China-Laos cooperation impact the Oudomxay project?

The project in Oudomxay province exemplifies the success of China-Laos cooperation. Beyond energy production, the project will drive improvements in local infrastructure, including roads, education, water supply and community facilities, while creating stable employment opportunities.

On December 18, local time in Laos, with the pouring of the first concrete at the construction site, CGN officially commenced the construction of Phase I of the 1-million-kilowatt PV ...
