Why do data centers need a DC/DC converter?

To help minimize the environmental impact of this growth, we offer smart, highly efficient, high power density power solutions, and our DC/DC converters contribute to reducing energy consumption and therefore lowering CO₂ emissions in data centers.

What is converged power solution?

Eltek's Converged Power Solution caters for all power needs in the data center. It combines the advantages of modern, modular power technology while meeting all AC and DC load requirements. The Converged Power Solution (CPS) is modular. In the unlikely event of a module failing, it can be replaced in minutes without affecting any loads.

Who can use smart micro modular data center solutions?

For small-sized DCs of financial institutions, governments, education and medical organizations, transportation and energy sectors Discover Smart Micro Modular Data Center Solutions with One Row One DC, delivering integrated power and cooling, flexible scalability, and reliable performance.

What is converged Power Solutions (CPS)?

Converged Power Solutions (CPS) offer a modular and flexible infrastructure to meet all data center power requirements within IT, telecom, cloud and banking sectors. It provides an unprecedented power availability for telecom, IT and cooling equipment in a very power dense solution.

Discover Smart Micro Modular Data Center Solutions with One Row One DC, delivering integrated power and cooling, flexible scalability, and reliable ...

Modular data centers offer rapid deployment and scalability, but their very strength--speed--often outpaces grid access. Prefabricated and containerized units can be ...

Discover Smart Micro Modular Data Center Solutions with One Row One DC, delivering integrated power and cooling, flexible scalability, and reliable performance.

The highly reliable Edge distributed power architecture provides a cost-effective solution to backup power needs in data centers by utilizing compact DC power ...

Deploy technology at the edge or anywhere your data is generated with modularized, integrated racks built

outside traditional data center constraints.

We offer a multitude of isolated and non-isolated, regulated and unregulated DC/DC solutions up to 3kW peak power to maximize system ...

It is modular, based on our High Efficiency power modules, and can be scaled from few kilowatts to many megawatts, scaled according to immediate business demand.

Deploy technology at the edge or anywhere your data is generated with modularized, integrated racks built outside traditional data center ...
