The MEG 100kW x 215kWh Cabinet is engineered as a modular energy storage building block, ideal for commercial facilities, microgrids, and community-scale projects.

With its advanced features, modular design, and expandability, this battery pack is an excellent choice for those seeking a robust and future-proof energy storage system.

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage requirement.

The ESS HV 50KW+100KWH is a fully integrated, modular battery storage system. Designed for C& I applications, it combines a PCS, BMS, LiFePO4 batteries, and EMS into a single, sleek cabinet to ...

Built with standard 5.12kWh battery modules, the system supports 4-14 modules in series for flexible voltage and capacity configuration. With up to 8 clusters in parallel, it delivers scalable energy ...

The 100kWh LiFePO4 solar battery storage cabinet (LZU-ESS-100A) is an efficient, compact solar battery storage cabinet for small-scale industrial and commercial energy storage applications.

The iCON 100kW 215kWh Battery Storage System is a fully integrated, on or off grid battery solution that has liquid cooled battery storage (215kWh), inverter (100kW), temperature control and fire safety ...

The modular battery cabinet design allows flexible capacity expansion with convenient installation and maintenance. The cabinet integrates a dual cooling system with fans and air conditioning.
