Kenya already generates over 90% of its electricity from renewables, a mix of geothermal, hydro, wind and solar. The region's energy ...

"By bringing Intersolar to Nairobi, we connect global expertise with local markets and accelerate investment and project development."

Summary: Nairobi's new energy storage base station marks a leap forward in East Africa's renewable energy adoption. Combining cutting-edge battery tech with solar/wind integration, this project ...

Intersolar Africa 2026 will take place in Nairobi on February 3-4, positioning Kenya as a key hub for solar power and energy storage in East Africa.

Solar photovoltaics combined with energy storage have emerged as the most cost-effective and scalable solution to expand capacity, stabilize supply, and strengthen long-term energy ...

On 3-4 February 2026, Intersolar Africa will take place at the Sarit Expo Centre in Nairobi, expanding from the successful Intersolar Summit Africa in 2025 into a full international exhibition ...

Kenya already generates over 90% of its electricity from renewables, a mix of geothermal, hydro, wind and solar. The region's energy transition creates space for both grid ...

Intersolar Africa 2026 to Position Nairobi as East Africa's Key Hub for Solar and Energy Storage. East Africa is emerging as one of the world's most dynamic regions for solar power and...
