What is Bess project?

The BESS project has been designed to integrate renewable energy into the distribution level grid system, facilitate grid stabilization, manage peak power demand, and address various ancillary needs. It will support in lowering power procurement costs and defer the need to upgrade the capacity at the Kilokari 33/11 kV power substation.

What is the fastest Bess project in India?

The approved project, a 20 MW (40 MWh) BESS with a life-span of 12 years, is being strategically installed at BRPL's 33/11 kV Kilokari substation in South Delhi. It is being commissioned within a record time-frame of around 10-12 months - purportedly the fastest for a BESS project.

How many hours a day does a Bess power?

The BESS provides four hours of uninterrupted backup power daily - two hours during afternoon peaks and two at night - helping replace fossil fuel based power generation during peak hours with renewable energy from solar or wind.

India's first commercial standalone battery energy storage system (BESS) project with a 20MW/40MWh capacity at the distribution company level ...
