Who is Nordic batteries?

At Nordic Batteries we assemble and manufacture customized battery- and energy storage solutions to drive your business forward. Based on our market and technological expertise we deliver solutions powering the green shift for key industries. High energy battery module produced in Norway from norwegian battery cells.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is a battery module & pack?

Battery modules and packs for applications with high energy and/or power requirements such as grid stabilization, light trucks and energy storage. Robust battery containers with batteries and charging solutions for construction, maritime, grid, and other hard-to-abate industries.

We also offer battery banks, which are particularly suitable for companies that want to store their own solar energy and become more self-sufficient. The batteries are available from 100 kWh to 400 kWh ...

Battery modules and packs for applications with high energy and/or power requirements such as grid stabilization, light trucks and energy storage. Robust battery containers with batteries and charging ...

They have advanced the technology components required for a high performance and advanced Lithium-ion battery pack for harsh winter conditions, occurring in Canada and other Nordic countries, ...

Nordic Batteries AS, founded in 2014 in Norway, specializes in advanced battery modules, packs, and energy storage systems for industrial sectors including construction, maritime, defense, ...

High-performance lithium battery packs ideal for industrial vehicles like forklifts, AGVs, and utility vehicles. A new generation of battery technology replacing traditional lead-acid batteries in ...

The eBOX was developed by ZEM in close collaboration with Moen Marin and Nordic Batteries to hybridize fishing vessels. Its compact size enables implementation in various environments ...

We also offer battery banks, which are particularly suitable for companies that want to store their own solar

energy and become more self-sufficient. The batteries are available from 100 kWh ...

That is why we design and manufacture lithium battery packs fully tailored to your machine. We select the right chemistry, including LFP, NMC and lithium-polymer, and match the geometry ...
