What is Oman's Oil Refinery?

Operational Excellence: In its inaugural year of operation (2023), the terminal successfully unloaded 19 crude vessels, totaling 29.10 MMbbl of crude. This project is a major economic driver for Oman and the region. The refinery is strategically located in the Duqm Special Economic Zone and will process 230,000 barrels of oil per day.

What is the north-south power grid interconnection project in Oman?

The first phase of the North-South Power Grid Interconnection Project in Oman [Photo/sasac.gov.cn] In accordance with Oman Vision 2040 and a 10-year power grid development plan, the Oman Electricity Transmission Company initiated the project's construction in May 2021.

Why does Oman offer incentives to international oil companies?

Because of the relatively high cost of production in the country, Oman's government offers incentives to international oil companies (IOCs) for exploration and development activities related to the country's difficult-to-recover hydrocarbons.

Where are Oman's Oil & natural gas discoveries located?

In 2017, Oman Oil Company Exploration and Production (OOCEP) announced three significant oil and natural gas discoveries in Block 60. The first of these finds, named Bisat, was reported to be north of the currently producing Abu Butabul (ABB) field.

Concurrently, Oman accelerated efforts to diversify its energy industry - scaling up refining capacity, launching large petrochemical projects, and pivoting to renewables and green ...

Elsewhere around Oman, OETC has lined up several other prestigious ventures for grid connection.

As the only GCC country not directly connected to the regional grid as of March 2025, Oman's involvement comes via linkage with the UAE grid. Through its existing indirect connection, Oman ...

Oman is a part of the Gulf Cooperation Council's (GCC) grid interconnection system, which allows for electricity transfers between the six connected countries (Kuwait, Saudi Arabia, Qatar, Bahrain, the ...
