What is the future of solar energy in Africa?

Innovative solar projects are revolutionizing rural African communities, offering solutions to long-standing energy access challenges. From off-grid systems to mini-grids and solar-powered water pumps, these technologies improve living standards, foster economic growth, and promote sustainability. The future of solar energy in Africa is bright.

Is solar energy a sustainable solution for rural Africans?

For millions of rural Africans, lighting a home or powering essential devices remains a daily struggle, emphasizing the urgent need for sustainable solutions. Solar energy emerges as a promising solution to address this challenge.

Why are C&I solar projects growing in Africa?

C&I solar projects continued to play a critical role in driving solar adoption across Africa. In 2024, the rolling pipeline for C&I projects grew by 15 per cent, reflecting sustained demand from businesses seeking cost-effective and reliable energy solutions.

Will large-scale solar projects make a comeback in Africa?

At the same time, large-scale solar projects made a notable comeback, with an 81 GW pipeline under development across the continent. This resurgence is expected to attract substantial foreign investment and contribute significantly to meeting Africa's growing energy demands.

Our research explores the role off-grid solar could play in different scenarios in Africa. It covered 43 countries for which data is available, and that are home to more than 99% of the ...

Should businesses choose onsite or offsite solar? As businesses work toward reducing their carbon footprints and energy costs, they face a pivotal decision: should they opt for an onsite ...

After years of subdued activity, utility-scale solar projects experienced a strong resurgence in Africa in 2024, accounting for 72 per cent of all new installations. This shift was driven ...

Our research explores the role off-grid solar could play in different scenarios in Africa. It covered 43 countries for which data is available, and that are home to more than 99% ...
