What is a 48U server rack?

A 48u server rack is equally at home in a dedicated data center or a smaller business environment looking to maximize their available square footage. When selecting the right rack, considerations such as weight capacity, cooling requirements, locking mechanisms, and compatibility with existing hardware are crucial.

How much does a data center rack cost?

Data Center Space - The floor space of a single rack can be as pricey as $50 - $200 per sq ft per year on rent or leasing costs. Power Consumption - The electricity consumption by the equipment placed in a full rack incurs an extra $1000-$10000 per annum in terms of power bills.

How much power does a datacenter use?

Today's datacenters use an average of 3kW to 5kW per rackto power server,storage,and networking racks. Most are designed to power basic CPUs to operate at high levels of efficiency. Hence,the traditional 12V power architecture has been widely accepted and implemented.
