What is an emergency lighting inverter?

An emergency lighting inverter converts DC battery power to standard AC voltages to provide backup for lighting systems in an emergency. They are commonly used with fire alarm systems, emergency lighting, exit lighting, and lighting control systems, among other critical or life safety-related equipment.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltage to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.
