Looking to 2030, Riga plans to deploy liquid air storage - essentially bottling winter cold for summer AC use. It's like making snowballs in July, but for real energy savings.

Our 2024 prototype even integrates with satellite internet constellations - sort of like a power bank for your Starlink connection. With 43 patents pending and \$200 million in Series C funding, Riga's ...

In Latvia's bustling capital, uninterruptible power supply vehicles are becoming essential assets for industries requiring 24/7 electricity stability. From data centers to healthcare facilities, these mobile ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger ...

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the bidding process, ...

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, ...

This transformation enables flexible resources such as distributed generations, energy storage devices, reactive power compensation devices, and interconnection lines to provide emergency isolated ...

Europe's most powerful battery energy storage systems to be installed in Latvia for the security of the energy system transmission network infrastructure and control technologies to prepare the Latvian ...
