What are the latest innovations in the field of perovskite solar cells?

Our customers can now benefit from the latest innovations in the field of Perovskite Solar Cells with our specifically designed titania pastes, perovskite light absorber precursor, and hole transport material. Titania paste for the deposition of a pinhole-free blocking-layer of titanium dioxide by screen-printing or slot-coating.

What are thermal solar tiles & hybrid solar tiles?

Thermal solar tiles are created primarily to catch and use solar heat instead of PV panels, which concentrate on generating electrical energy. Hybrid solar tiles are roofing shingles that produce solar energy and mix solar and non-solar tiles to produce a roof that both produces energy and protects against the weather.

What are hybrid solar tiles made of?

The typical material for hybrid solar tiles is tempered glass, with a 25-year warranty. Typically, they are made of solar and non-solar tiles made of clay, asphalt, and ceramic. Both solar panels and roof tiles generate clean, renewable energy that powers dwellings.

Interested in solar tiles? Our comprehensive buying guide covers everything you need to know, from installation to maintenance and cost savings.

With ongoing advancements in technology and supportive government policies, the future outlook for the perovskite solar cell market in Saudi Arabia appears promising.

Increasing research and commercialization efforts in Saudi Arabia are accelerating the adoption of perovskite solar technology. Government ...

Our customers can now benefit from the latest innovations in the field of Perovskite Solar Cells with our specifically designed titania pastes, perovskite light absorber precursor, and hole transport material.

The new discovery is the result of joint efforts by Professor Stefaan De Wolf and his research team from KAUST Solar Center that aim to improve the efficiency of solar energy in line with the Kingdom's ...

Leading provider of solar energy and lighting solutions. Discover our innovative products and services for sustainable energy solutions.
