High-quality 5MWh energy storage systems, certified to international standards and trusted in 160+ countries. End-to-end service, from pre-sale consultation to after-sales support.

High Energy Capacity: This system offers a maximum energy storage capacity of 5MWh, making it suitable for large-scale commercial applications, as requested by the user.

With a compact footprint and high energy density, the DC cabin maximizes energy storage capacity while minimizing space requirements. Equipped with an intelligent energy management system, it ...

Product features(Containerized Energy Storage System): Low energy consumption, long life, high consistency, high stability. Application scenarios: ...

The company has mature experience and system design integration capabilities in the fields of carbon materials, monomers, modules, energy storage systems, energy storage safety and fire protection, ...

Ideal for industrial parks, data centers, and large-scale commercial power needs, it offers a durable and scalable energy storage solution.

The Vertiv(TM) EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical ...

The HJ-G0-5000F is a 5 MWh lithium iron phosphate (LFP) energy storage system, designed for reliability in harsh environments. With LFP 3.2V/314Ah cells, $\leq 3\%$ self-discharge, and $\leq 5\%$ SOC ...
