What is a telecommunications enclosure?

Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments. These purpose-built cabinets are engineered to protect susceptible telecommunications equipment, such as routers, switches, power supplies, and network components, from environmental elements and potential security threats.

Why do you need a telecom enclosure?

Provide complete protection and security for your telecoms equipment with steel enclosures and GRP cabinets by the Eldapoint Group. Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments.

What materials are used in telecommunication enclosures?

A choice of aluminium or steel panels or GRP with ply core. Our enclosures comply with industry standards and regulations, ensuring that telecommunication equipment housed within meets safety and performance requirements. We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel.

What is the IP55 specification for outdoor telecoms street enclosures?

We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel. Compliance with IP (Ingress Protection) ratings and NEMA (National Electrical Manufacturers Association) standards certifies their ability to withstand environmental conditions and protect sensitive equipment.

We design and manufacture steel and GRP telecommunications field cabinets for housing roadside telecommunications and IT equipment. Our outdoor ...

The primary driver of market growth is the accelerated adoption of 5G technology, which demands sophisticated outdoor enclosures capable of supporting high-bandwidth, low-latency applications.

We provide rugged telecommunications enclosures featuring secure lockable doors and anti-tamper mechanisms to protect valuable equipment. Our solutions ...

We provide rugged telecommunications enclosures featuring secure lockable doors and anti-tamper mechanisms to protect valuable equipment. Our solutions incorporate efficient cooling systems, ...
