---

Tailored for data center retrofits and modular containers by matching the width of four standard IT racks (4 x 600mm rack spaces), the unit can also be positioned sideways in a standard ISO ...

Submerge your server into a bath of non-conductive liquid and allow thermal generated by computer components to be transmitted into the fluid and cooled using either a single-phase or ...

Experience next-generation immersion cooling solutions from GRC. Our solutions increase performance, enhance sustainability and optimize TCO, setting new standards of data center cooling efficiency.

Submerge your server into a bath of non-conductive liquid and allow thermal generated by computer components to be transmitted into the fluid and cooled ...

Single-phase cold plates are increasingly being deployed to manage the extreme heat generated by today's servers, far surpassing the capacity of traditional air-cooled systems. ...

ACT offers expert guidance and purpose-built systems to manage heat throughout your data center--from dense server racks to facility-level HVAC and remote edge deployments.
