One large system is now installed, others are in the pipeline. As battery storage becomes increasingly important in the quest to fully utilise renewable energy sources, a raft of projects in ...

One large system is now installed, others are in the pipeline. As ...

Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh battery energy storage system (BESS), the first of many projects planned for deployment in 2024.

To tackle these challenges, Greenbat and Pixii initiated a project, facilitated by MTS spol. s r.o., Pixii's exclusive representatives for Slovakia, Czech Republic, and Hungary, to install and ...

But did you know Slovakia's capital is now charging ahead (pun intended) with Europe's most ambitious large-scale energy storage project? Let's unpack this energy marvel that's making utility companies ...

Vanadium redox systems, though pricier upfront, provide critical long-duration storage (8-12 hours) for Slovakia's solar farms. The Kosice Pilot Project achieved 98% round-trip efficiency using novel ...

In a landmark achievement, Wattstor and ENERGE have successfully implemented a cutting-edge 1.5 MW / 1.6 MWh Battery Energy Storage System (BESS) for ancillary services in ...

European Commission funding is supporting a project to integrate battery storage at a pumped hydro energy storage (PHES) plant in Slovakia.
