A block-like organization is uncovered in P (NIPAM- co -NIPMAM) microgels synthesized via one-step copolymerization, using a combination of small-angle neutron scattering (SANS), dynamic light ...

The major advantage of solar / wind hybrid system is that when solar and wind power production are used together, the reliability of the system is enhanced. Additionally, the size of battery storage can ...

Nestled between the Alps and the Adriatic, Slovenia has launched a 48MW photovoltaic farm in Vojnik - its largest to date. This \$35 million project demonstrates how small nations can achieve big energy ...

Small is a nanoscience & nanotechnology journal providing the very best forum for fundamental and interdisciplinary applied research at the nano- and microscale, covering chemistry, ...

A block-like organization is uncovered in P (NIPAM- co -NIPMAM) microgels synthesized via one-step copolymerization, using a combination of small-angle neutron scattering (SANS), dynamic ...

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator (ELES) and the ...

This issue marks the start of the 20th anniversary of Small. In the last 20 years, Small has grown to become an essential journal providing the very best forum for fundamental and ...

The review shows there are currently at least 58 locations on the territory of Slovenia where it is possible to set up utility-scale solar power plants ...
