Moonwatt launches Europe's first sodium-ion energy storage project in the Netherlands. The modular NFPP system marks a commercial milestone for alternative battery tech.

Table salt accounts for 90% of the sodium in the U.S. diet. Sodium helps balance fluid and electrolyte levels in the body. This balance can affect blood pressure and kidney and ...

Learn how we are building safer, scalable battery technologies made entirely in Europe. Explore the vision, goals, and team behind ATENA+. Discover the methodologies driving our ...

Bringing together 17 partners (8 industry, 2 SMEs and 8 academic partners) from 11 European countries, SPRINT is an ambitious 46-month project that aims to revolutionise the stationary energy storage ...

One year after forming a strategic partnership, Stora Enso and Altris are taking meaningful steps toward building sustainable sodium-ion battery technology in Europe.

As part of the "EPISODE" project, battery cells and battery storage systems based on sodium-ion cells are being developed in an innovative European value chain as a pioneering alternative to ...

Sodium is a mineral required for blood pressure regulation and nerve function. Excessive sodium intake can cause high blood pressure and heart disease.

Learn more about Sodium uses, effectiveness, possible side effects, interactions, dosage, user ratings and products that contain Sodium.
