Understand the complexities of siting and permitting wind energy projects, including federal and state regulations, environmental reviews, and strategies to address ...

Because large-scale solar and wind projects typically are built outside city limits, USA TODAY's analysis focuses on restrictions by the county-level governments that have jurisdiction.

Like wind power, photovoltaic (PV) solar power has also been impacted by an increasing number of state and local ordinances that restrict where solar power may be deployed.

State and local zoning laws and ordinances influence how and where wind and solar energy projects can be sited and deployed--which can have a measurable impact on U.S. ...

Like solar power, electricity generated from a wind project can be used on-site or off-site. In the case of wind projects, off-site purchasers of the power may be hundreds of miles away, in ...

In the U.S., wind and solar project development continues to increase. In fact, the Energy Information Administration (EIA) anticipates that wind and solar energy will continue to exceed electrical ...
