-----

In October, Spanish energy company Iberdrola announced plans to move ahead with two solar projects totaling 535 MW in Mexico, marking a renewed commitment to the country's energy ...

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Mexico can unlock the full potential of energy storage solutions by fostering greater integration of renewable energy, supporting grid stability, and improving regulations related to battery storage.

Mexico's own planning documents acknowledge the scale of the challenge ahead, pointing to the need for approximately 8-9GW of energy storage capacity by the mid-2030s to support higher ...

By 2030, Mexico anticipates adding 2.2 GW of battery energy storage systems as part of its broader energy strategy. This integration not only enhances the reliability of renewable sources ...

Mexico is experiencing a rapid acceleration in large-scale solar and energy-storage proposals, following the government's rollout of a new decree in mid-October that more tightly ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

By 2030, Mexico anticipates adding 2.2 GW of battery energy storage systems as part of its broader energy strategy. This integration not only enhances the reliability of ...
