What is a solar energy kit?

Our solar energy kits make it easy to install antennas and repeaters at the best vantage points, and offer clean, reliable energy that can be scaled to power any system in either AC or DC current. Zone = Historical Peak Sun Hours in the worst month of the year with solar panel at 45° angle.

What can a solar power kit do for You?

Extend the range and coverage area of a telecommunications network to hard-to-reach and remote locations with our solar power kits. Our kits can be scaled to power any equipment necessary, and we also offer a variety of data backhauling options in order to strengthen connections.

Why should you choose a containerized solar micro grid?

Cellular Towers Cellular towers are often times in remote areas with little infrastructure around them. Minimizing the amount of service they require helps drive down operation costs. Our containerized solar micro grids are quick and easy to install, require very little infrastructure, and can reliably provide on-site power without interruption.

Why should you choose a solar power module?

In addition to our superior protection features, they are equipped with a solar panel and powerful backup battery that offer an uninterrupted power supply to small electronic devices. Our solar power modules are pre-built, easy to install, and scalable to fit operational requirements.

With a plug-and-play design and low maintenance requirements, the system eliminates the need for traditional grid power or fuel generators, offering a sustainable and cost-effective way to expand ...

Wind-solar hybrid for outdoor communication base stations Integrated Solar-Wind Power Container for Communications This large-capacity, modular outdoor base station seamlessly ...

Extend the range and coverage area of a telecommunications network to hard-to-reach and remote locations with our solar power kits. Our kits can be scaled to power any equipment necessary, and ...

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

With this solar-powered solution, telecom operators can reduce their reliance on the grid and ensure
