What is a cathodic protection & corrosion control service?

Cathodic protection and corrosion control services include products, engineering, and installation. Farwest is a leading, full line distributor and manufacturer of corrosion prevention products. These include coatings, isolation equipment, test and inspection tools, instrumentation and more.

What is a modular cabinet?

Modular stainless steel cabinets provide flexible, sterile storage for research labs, surgery centers, and medical facilities. Metal casework cabinets with modular designs for healthcare, research, and industrial storage needs. Outfit your 911 center or control room with modular command center consoles built for 24/7 emergency operations.

What is modular steel lab casework?

Modular steel lab casework offers major advantages over traditional built-in millwork--especially in high-use lab settings. With steel construction, you gain durability, faster installation, and flexibility. Steel options are more resistant to chemical wear and provide a cleaner, more sterile work surface.

Why do hospitals use stainless steel cabinets?

Stainless steel cabinets were chosen for chemical resistance, longevity, and easy cleaning. Modular storage and flexible work zones supported multiple departments, and installation was scheduled during winter break to minimize disruption. Durable casework designed for hospital compliance and efficiency.

Southwest Solutions Group supports your project with planning, layouts, and turnkey coordination--so you get a blast-rated workspace that fits your hazard profile, footprint, and schedule. Explore ...

Discover the 120kWh Micro-grid Air-cooled ESS -- a modular, all-in-one battery energy storage system for commercial and industrial applications. On-grid/off-grid support, smart monitoring, ...

Choose cabinets made from corrosion-resistant and impact-resistant materials. Non-conductive interior surfaces prevent electrical hazards, ensuring safe storage for lithium-ion batteries.
