SgurrEnergy has secured a contract to lead Sri Lanka's first 100 MW solar photovoltaic (PV) project integrated with a 12 MWh battery energy storage system (BESS). The project aims to ...

As Sri Lanka accelerates its transition toward renewable energy, innovative solutions like new energy storage cabinets are becoming critical for stabilizing power grids and maximizing solar/wind energy ...

In Sri Lanka, solar energy storage systems are gaining traction as the country seeks to diversify its energy sources, reduce dependency on fossil fuels, and promote sustainable development.

The project establishes Sri Lanka's largest non-government-funded battery energy storage system (BESS), powered by solar photovoltaic (PV) technology. The Battery Commissioning Event ...

As Sri Lanka's energy demands evolve, hybrid renewable systems combining solar, wind, and battery storage are becoming the new normal. ISL is proud to be part of this transformation, ...

SgurrEnergy has secured the contract to develop Sri Lanka's first 100 MW solar photovoltaic project with a 12 MWh battery energy storage system (BESS). It will be implemented in ...

Nestled in Sri Lanka's hill country, Kandy is embracing rooftop photovoltaic (PV) systems with energy storage to combat frequent power outages and rising electricity costs.

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented over the next ...
