St. George Power operates a "run of river" hydroelectric facility on the Magaguadavic River in St. George, New Brunswick. Our hydro facility has an annual generating capacity of 45,000 ...

With the scorching triple-digit temperatures in southern Utah, St. George is proactively protecting its power grid by issuing an Orange Alert.

SGESD has a diverse wholesale energy portfolio, including coal, hydro, natural gas, diesel, and solar. The solar comes from the City's own solar farm "SunSmart", which has a nameplate capacity of 250 ...

Summary: This article explores the critical role of grid connection timelines for the St. George Energy Storage Station, analyzing technical challenges, regulatory frameworks, and innovative solutions.

If there is an outage that is affecting your area, it is not possible to restore power to any one home or business until the situation has been restored and power is available to all customers in the affected ...

St George Group supports grid-scale and behind-the-meter energy resilience systems designed for environments where power stability, safety, and long-duration operation are mission-critical.

ST. GEORGE -- With the scorching triple-digit temperatures in southern Utah, the city of St. George is proactively protecting its power grid by issuing an "orange alert."

The alert is part of a color-coded system designed to alert residents of the need to conserve energy in order to avoid overloading the city's power grid.
