-----

This study examines the thermal behavior of ladle metallurgy furnace (LMF) steel slag for potential applications in thermal energy storage, with a focus on how the size of the spherical slag ...

Leveraging onsite and nearby renewable energy, electrification, carbon capture and storage and a local supply chain, the new mill is expected to produce rebar with 85% ...

In the U.S., where 70% of steel is EAF-produced, companies like Pacific Steel Group, Nucor, and Steel Dynamics are ...

In compressed air energy storage (CAES) facilities, steel reinforcement systems protect against geological shifts and prevent air leakage. These underground installations demand custom ...

The project leverages Shougang Group's annual production of 120,000 mt of industrial by-product hydrogen resources, combined with regional wind and solar green electricity hydrogen ...

By leveraging the expertise of renewable energy developers like Pacifico Energy, they could push the envelope further, integrating solar, battery ...

In 2025, the CEC awarded Pacific Steel Group a \$14 million grant to deploy a 4 MW/32 MWh zinc hybrid cathode battery LDES system to support the Mojave Micro Mill project in Mojave, ...

In compressed air energy storage (CAES) facilities, steel reinforcement systems protect against geological shifts and prevent air leakage. These underground installations ...
