How much does a 10MW solar power plant cost in India?

On average, the cost of a 10MW solar power plant in India ranges between Rs 49 to 50 crores. Several factors influence the initial solar investment. The key component making up a solar power plant is the solar panel which comes in various forms.

Why should you choose Pennar group for solar module mounting structures?

In India, the solar energy sector has witnessed exponential growth, driven by technological advancements and government initiatives aimed at promoting clean energy. At the forefront of this revolution is Pennar Group, recognized as a leading provider of Solar Module Mounting Structures (MMS).

Why should you buy a 10MW solar power plant?

As you settle the entire cost of the 10MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

Can a 10MW solar power plant run a commercial establishment?

A 10MW solar power plant can run a commercial establishment independently from the Electricity grid. This size of solar farms takes up 49 to 50 acres of space and gives about 40000 kWh of low-cost electricity every day. Surplus power can subsequently be sold to the Electricity DISCOMs as per net metering mechanism of respective state government.

Discover top 5 government solar panel schemes in India for 2025, Learn about key government subsidies for solar panels like PM Surya Ghar, PM-KUSUM, and more!

Our mounting structures support large-scale solar farms, which are essential for harnessing solar energy on a commercial scale. These structures are engineered for optimal performance, providing the ...
