Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented 'rogue' communication devices hidden inside solar power inverters imported from China.

Are secret cellular radios inside solar inverters & solar batteries?

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar batteries made by Chinese companies. These components are widely used in U.S. infrastructure to connect solar panels to the grid and store solar energy.

Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Did solar equipment have a built-in communication system?

It's not unusual for solar equipment to have built-in communication systems. These features allow companies to push software updates and monitor performance remotely. But the concerning part, according to Reuters, is that these specific devices were not documented. That means they were hidden on purpose.

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar batteries made by Chinese companies. These ...

To solve this problem, the local operator has decided to introduce a solar power supply system to provide stable and reliable power support for communication towers.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating ...

This research paper presents the results of the implementation of solar hybrid power supply system at telecommunication base tower to reduce the fuel consumption at rural area.

Figure 1 shows typical power line communication options implemented in different solar installations. These

installations can be divided into communication on DC lines (red) and communication on AC ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar batteries made ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by ...
