-----

The systems are available in three configurations with maximum AC output power up to 36, 54 or 72 kVA. AC distributions are integrated in the cabinet with possible 3 phase or 1 phase load breakers.

Front access cabinet with both top and bottom cable connections. Each individual module is configured with an independent DSP controller to avoid single point of failure risk.

Front access cabinet with both top and bottom cable connections. Each individual module is configured with an independent DSP controller to avoid single point of failure risk.

By using either individually connected diodes, or with just one single integrated bridge rectifier module. The use of Power Diodes and Rectifiers allows us to ...

Versatile DC power solution with high efficiency eSure™ rectifiers, converters and inverters, modular distribution, and advanced control and monitoring accepts single or three-phase input up to 277/480 ...

Liebert EXS models up to 20 kVA can be configured on-site to deliver three (3/3) or single (3/1) phase output giving it the flexibility to adapt to changes in installation environments. Liebert EXS provides ...

User-programmable features such as slew rate, phase angle rate-of-change and voltage rate-of-change allow the UPS to quickly sync to a genset during emergency back-up.

The rectifier is built inside a compact cabinet and can be equipped with optional items such as distribution breakers, blocking diode, communication ports etc. The cabinets are floor mounted and ...
