Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

What is a telecom cabinet?

A telecom cabinet is a specialized enclosure designed to house and protect telecommunication equipment. These cabinets shield sensitive devices from environmental factors like dust, moisture, and temperature fluctuations. They also provide security against unauthorized access.

What is a multitenant outdoor cabinet?

Vikiner's multitenant outdoor cabinets enable multiple operators or equipment types to share the same protected infrastructure. Segmented internal layouts and isolated compartments ensure electrical and thermal separation, making them ideal for shared telecom or co-location sites. Get technical specifications and pricing tailored to your project.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers, server rooms, and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors, they do not require extensive weatherproofing.
