To make it portable again, I'm considering running it off an external power bank, opting for a higher capacity to get more run time. If I can match the power bank output to that of the mains ...

So if you're having power issues when powering your camera externally, try using the GoPro labs firmware and select the TUSB=1 command to bypass power requirement checking.

Plug your power bank into a wall outlet if possible. Your power bank should have come with a USB cord and wall adapter. Plug the larger end of the USB cord into the wall adapter. Then, plug the smaller end into your power adapter. Leave the power bank to charge.

Wondering whether you can run your GoPro with external power without having the internal battery installed? What's known as pass-through ...

Charging nickel-based batteries with a power supply is challenging because the full-charge detection is rooted in a voltage signature that varies with the applied charge current.

If you want to use an external power supply to ensure your camera stays on, this tutorial shows you what to do and what you'll need, step by step.

Understanding the No.9 Charging Challenge If you're an outdoor enthusiast or remote worker relying on No.9 devices (industrial-grade portable electronics), you've probably asked: "Can my outdoor power ...
