What is a street lighting cabinet?

Street lighting cabinets allow to control the time of switching on and off the lighting of streets, parks, squares or objects. Depending on the needs, we make systems based on simple astronomical clocks as well as modern solutions using GPS, GPRS, GSM technologies.

How does capelon smart Streetlight work?

Up until 2016, Capelon has only delivered smart streetlight based on a standard powerline communication (ISO/IEC 1498-3). In the streetlight cabinet, there is a cabinet controller which can communicate via the mains to lamp controllers mounted in the luminary or on the pole.

What is a streetlight cabinet controller?

The cabinet controller monitors the operation within the streetlight cabinet, including grid parameters such as power, cosfi, current and voltage. The Central Management System is called the GreenStreet Vision. By dimming, smart streetlights can save up to 50% of energy consumption.

How does a streetlight cabinet work?

In the streetlight cabinet, there is a cabinet controller which can communicate via the mains to lamp controllers mounted in the luminary or on the pole. Using powerline communication has several advantages and is well-suited in many cases.
