How will Victoria's New Energy Hub work?

Next year the Hub will start storing excess rooftop solar and surplus energy from the grid, providing extra power at peak times to meet Victoria's growing demand. It will be connected to three Renewable Energy Zones allowing more energy to connect to the grid - helping to accelerate the energy transition and drive down energy bills.

How many power hubs are there in Australia?

With eight systems in the range, from compact single-phase setups to heavy-duty three-phase models, Power Hubs are built to deliver uninterrupted, efficient energy all year round, no matter where in Australia you are. What Makes Power Hubs Different? Engineered for real Aussie conditions. Built to last!

Are power hubs a good choice for Australians living off-grid?

Power Hubs are trusted by thousands of Aussies living off-grid. I had a 13kW off-grid system installed by Commodore Australia, complete with Pylontech batteries and a PowerHub cabinet, and I couldn't be happier with the experience.

How much power does a new energy hub have?

Once completed in 2025, the Hub will have three battery components providing 1.6 gigawatt hours of energy storage, enough to power up to 200,000 homes during peak periods.

Singapore-based Equis Development Pte Ltd and Victoria's State Electricity Commission (SEC) have powered up the Melbourne Renewable Energy Hub, a 600-MW/1,600-MWh battery that ...

In some alpine areas of Victoria, such as Healesville, the Mount Buller region, Yarra Ranges, and up to Mount Kosciuszko in NSW, implementing an off-grid solar system can be more ...

Our Solar Retrofit Power Hub is an outdoor off-grid power source that integrates with existing outdoor bus stations and whenever an off-grid ...

Our Solar Retrofit Power Hub is an outdoor off-grid power source that integrates with existing outdoor bus stations and whenever an off-grid power source is needed to provide access to 100% solar energy.

Discover how energy backup system funding is supporting community hubs across Victoria. An energy backup system consists of solar PV, battery storage and generators ...
