What are Victoria's energy storage goals?

It is worth noting that Victoria has several energy storage targets in place, including having at least 2.6GW of capacity by 2030, with this to be increased to at least 6.3GW by 2035. Eku Energy is an energy storage development platform that was launched through the Macquarie Asset Management-owned Green Investment Group (GIG) in late 2022.

Why did energy dome choose Victoria?

Energy Dome chose Victoria for its collaborative energy industry, ambitious net-zero targets, strong commitment to renewable energy and attractive investment initiatives. As the state transitions from coal-fired power and faces growing industrial energy demands, it presents an ideal environment for long-duration energy storage solutions.

What is Victoria's largest gas-fired generator?

Mortlake is Victoria's largest gas-fired generator, with a generation capacity of 566MW. Located adjacent to the Moorabool to Heywood 500kv transmission line, the power station also sits within Victoria's South-West Renewable Energy Zone (REZ).

Why is energy dome establishing an APAC team in Victoria?

Energy Dome has identified critical advantages in establishing our APAC team in Victoria to lead the deployment of the CO2 Battery, and the Victorian Government's support will enable us to accelerate our expansion in the state.

Construction has been completed on the second-largest battery energy storage system (BESS) in the Australian state of Victoria.

Energy Dome, a global leader in long-duration energy storage (LDES), is expanding its presence in Victoria, supported by the Victorian Government, to accelerate the ...

Sustainable energy storage solutions provider Energy Vault has entered an agreement with the State Electricity Commission (SEC) of Victoria to deliver a 100MW/200MWh battery energy...

Our current projects include several large-scale solar developments, battery energy storage systems co-located with our existing power stations and expansion of the Shoalhaven pumped ...
