What will Victoria do about coal-fired power stations?

A balance of renewable energy generation and storage will be required to replace retiring coal-fired power stations and ensure Victoria's electricity system is affordable, reliable, safe, and sustainable. Actions include: Building energy storage- like the Victorian Big Battery - to help provide reliable renewable energy throughout the transition.

What is Victoria's biggest renewable battery?

Victoria has approved its biggest-ever renewable battery, a one-gigawatt storage facility in Portland. The battery is set to anchor the state's energy transition and provide firming capacity for hundreds of thousands of households. Pacific Green's \$1.3 billion Portland Energy Park will deliver 1GW/2.5GWh of storage through four 250MW battery units.

What is Victoria's largest-ever battery storage project?

The Allan Labor Government has approved Victoria's largest-ever battery storage project - a one-gigawatt facility that will deliver cleaner, cheaper, and more reliable renewable energy for hundreds of thousands of homes. Pacific Green's Portland Energy Park has been fast-tracked through the Labor Government's Development Facilitation Program.

Will a new Battery Boost Victoria's energy supply?

Energy and Resources Minister Lily D'Ambrosio said the battery would play a key role in stabilising Victoria's energy supply. "This battery will soak up cheap renewable power during the day and deliver it when demand peaks - powering 345,000 homes and slashing energy bills across the state," she said.

Lumea, part of the Transgrid Group, is moving forward with the development of a large-scale battery system intended to supply renewable, affordable, and reliable energy to electricity ...

Victoria is set to build its largest battery storage project. The new one-gigawatt facility will deliver renewable power to hundreds of thousands of homes across the state.

The Victorian Government has approved the state's largest battery storage project, a one-gigawatt facility at Pacific Green's Portland Energy Park, which it says will support cheaper, ...

While we know the location is Horsham, we don't yet know who will get the contract to build the solar farm and which manufacturer will supply the ...
