The Eraring battery energy storage system achieved commercial operation in December 2025, delivering 460MW of power output with approximately 3.8 hours of continuous discharge ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

Australia must maintain this momentum. The National Electricity Market (NEM) will need 33 GW of dispatchable, grid-scale battery and pumped-hydro storage by 2050, in addition to the 7 GW ...

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, impressive capacity.

Australia is now the third-largest market worldwide for large-scale battery energy storage by capacity with 14 GW/37 GWh of battery energy storage capacity at or nearing financial...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Finnish energy giant W&#228;rtsil&#228;; has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh...
