What is a whole home battery backup?

A whole home battery backup is an energy storage system designed to keep your home powered when the grid fails. Unlike small portable power stations that run a few appliances, these large systems can support entire households.

What is a Growatt axe 5kwh battery?

Power your home with the Growatt AXE 5.0L-C1 5kWh battery--an advanced solar battery storage solution for whole home battery backup. Perfect for energy independence and outage protection, it delivers reliable performance for solar battery backup systems.

What are the best whole-home backup batteries in 2025?

Among the many options on the market, the EcoFlow DELTA Pro Ultra Whole-Home Backup Power stands out as the top choice for Canadian households in 2025. This system is engineered for flexibility, resilience, and unmatched capacity, making it one of the best whole home backup batteries this year. Key Advantages:

How much does a whole home battery backup cost?

The best whole home battery backups from EcoFlow typically range from \$5,000 to \$10,000 CAD for the base unit, with expandable options available for larger households. It's also important to factor in installation costs, which may vary based on your home's electrical setup and whether you're pairing the battery with solar panels.

This is an all-in-one, AC-coupled storage system with a total usable energy capacity of 5.0 kWh.
