The machine-side converter rectifies the three-phase AC output from the fan-motor stator to DC to achieve stable DC voltage output under the conditions of ...

Our control cabinets are built with the latest technology, ensuring compatibility with SCADA systems for real-time monitoring and data-driven decision-making. With modular designs, ...

Our control cabinets are built with the latest technology, ensuring compatibility with SCADA systems for real-time monitoring and data-driven ...

The machine-side converter rectifies the three-phase AC output from the fan-motor stator to DC to achieve stable DC voltage output under the conditions of different wind speeds and rotational speeds ...

The present utility model relates to the technical field of wind power generation. Disclosed is a control cabinet for a wind turbine generator.

Supports AC30V input, with DC14.5V/29V cut-off voltage, suitable for 100W/200W, 12V/24V wind turbines. Offers efficient charging with a 15A current, featuring precise voltage control for battery ...

Fibox is experienced in engineering, manufacturing and testing the required control units for wind turbines, and we can apply complete freedom in the design of enclosures specific to your application.

Compact design that minimizes space usage, perfect for areas with limited space. Built with durability in mind, guaranteeing an exceptionally long service life.
