Is wind the new energy economy in Brazil?

Wind has been recognised across government ministries as a vector for Brazil's new energy economy, endorsed by important ministries such as the Ministry of Mines and Energy, Ministry of Finance and Ministry of Development, Industry and Foreign Trade. The Brazilian wind production chain in the last three years, has been showing signs of weakening.

How do wind farms affect Brazil's economy?

Every R\$1.00 invested in wind farms has an impact of R\$2.9 on GDP. It's renewable, pollution-free and it helps Brazil meet its goals under the Climate Agreement. It allows the landowner to continue planting crops or raising animals. It generates income and improves the lives of landowners who lease the towers.

Do offshore wind projects need environmental licensing in Brazil?

According to the Brazilian Institute for the Environment and Renewable Natural Resources offshore wind projects have requested environmental licensing, representing the strong appetite for development in Brazil.

What to expect in 2024

This study has set a record for wind speed distributions for SP and RJ by Weibull, GUM, and GEV distributions, thus providing useful information about the wind power potential in these regions.

O desafiante momento atual do setor elétrico brasileiro e os potenciais do protagonismo do país na transição energética global foram os principais pontos ...

But here's the kicker: droughts are making reservoirs unreliable, while wind and solar installations are exploding across the Northeast. The real question isn't whether Brazil should adopt renewables, but ...

This advancement in the São Paulo Metro exemplifies the dynamic growth of wind power in Brazil, which in 2023 continued to expand its installed capacity with new wind farms across the ...

For the third consecutive year, Brazil achieved new wind records, reaching 4.8 GW of new installed capacity, more than 1,000 wind farms in operation and surpassing 30 GW of total ...

An analysis of offshore wind power feasibility in the Brazilian power system will be conducted, considering environmental implications, synergies with the oil industry, costs, and complementarities ...

The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.

For the third consecutive year, Brazil achieved new wind records, reaching 4.8 GW of new installed capacity, more than 1,000 wind farms in ...
